Oracle Public Cloud Machine - Disconnected Mode				
Part Number	SUBSCRIPTION SERVICE	Metric	INCLUDED WITH SUBSCRIPTION SERVICE	ADDITIONAL REQUIREMENTS AND PREREQUISITES
Oracle Public Cloud Machine - Disconnected Mode - High Cost Region				
B87635	Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee	Each	High Cost Region countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Puerto Rico, Spain, Sweden, Switzerland, United Arab Emirates, United Kingdom, and United States. Disconnected Mode services are available for both Oracle Public Cloud Machine X5 Models; and Oracle Database Exadata Cloud Machine X6 models.	<p><i>Base Fee</i> covers the minimum costs for the Oracle resources at a specific customer site (e.g., a single data center or IT facility) and the <i>Add-On Rack Fees</i> cover the additional costs associated with the number of racks the customer has purchased for that site. In addition, if the customer has additional data centers or IT facilities that can be managed remotely by that on-site Oracle resource, only the <i>Add-On Fees</i> need to be applied to the racks in the remote site or sites (i.e., no <i>Base Fee</i> is required since the remote sites do not require on-site resources from Oracle).</p> <p>Examples:</p> <p>Customer has 2 data centers: Data Center A and Data Center B and each data center has 1 full rack (for a total of 2 full racks).</p> <p>Data Center A and Data Center B each require Oracle on-site management. In this example, the customer would be charged the <i>Base Fee</i> plus the <i>Add-On Full Rack Fee</i> for each data center (i.e., charged twice for the <i>Base Fee</i> and charged twice for the <i>Add-On Full Rack Fee</i>).</p> <p>However, if only Data Center A requires Oracle on-site management and Data Center B can be remotely managed by the same on-site Oracle resource in Data Center A, in this example, the customer would be charged the <i>Base Fee</i> and the <i>Add-On Full Rack Fee</i> for Data Center A and just the <i>Add-On Full Rack Fee</i> for Data Center B.</p> <p>NOTE: Discounting greater than 0% for either of the following two services requires HQAPP approval:</p> <ul style="list-style-type: none">- Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee- Oracle Public Cloud Machine - Disconnected Mode 8x5 - Base Fee

Oracle Public Cloud Machine - Disconnected Mode				
Part Number	SUBSCRIPTION SERVICE	Metric	INCLUDED WITH SUBSCRIPTION SERVICE	ADDITIONAL REQUIREMENTS AND PREREQUISITES
Oracle Public Cloud Machine - Disconnected Mode - High Cost Region				
B87635	Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee	Each	High Cost Region countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Israel, Italy, Japan, Luxembourg, Netherlands, New Zealand, Norway, Portugal, Puerto Rico, Spain, Sweden, Switzerland, United Arab Emirates, United Kingdom, and United States. Disconnected Mode services are available for both Oracle Public Cloud Machine X5 Models; and Oracle Database Exadata Cloud Machine X6 models.	<p><i>Base Fee</i> covers the minimum costs for the Oracle resources at a specific customer site (e.g., a single data center or IT facility) and the <i>Add-On Rack Fees</i> cover the additional costs associated with the number of racks the customer has purchased for that site. In addition, if the customer has additional data centers or IT facilities that can be managed remotely by that on-site Oracle resource, only the <i>Add-On Fees</i> need to be applied to the racks in the remote site or sites (i.e., no <i>Base Fee</i> is required since the remote sites do not require on-site resources from Oracle).</p> <p>Examples:</p> <p>Customer has 2 data centers: Data Center A and Data Center B and each data center has 1 full rack (for a total of 2 full racks).</p> <p>Data Center A and Data Center B each require Oracle on-site management. In this example, the customer would be charged the <i>Base Fee</i> plus the <i>Add-On Full Rack Fee</i> for each data center (i.e., charged twice for the <i>Base Fee</i> and charged twice for the <i>Add-On Full Rack Fee</i>).</p> <p>However, if only Data Center A requires Oracle on-site management and Data Center B can be remotely managed by the same on-site Oracle resource in Data Center A, in this example, the customer would be charged the <i>Base Fee</i> and the <i>Add-On Full Rack Fee</i> for Data Center A and just the <i>Add-On Full Rack Fee</i> for Data Center B.</p> <p>NOTE: Discounting greater than 0% for either of the following two services requires HQAPP approval:</p> <ul style="list-style-type: none">- Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee- Oracle Public Cloud Machine - Disconnected Mode 8x5 - Base Fee
