

Oracle Cloud

Platform as a Service and Infrastructure as a Service - Public Cloud

Global Price List

March 7, 2024

## Table of Contents

<b>Section 1</b>	
<b>Universal Credits</b>	
<b>Oracle Analytics Cloud Services</b>	
Oracle Analytics Cloud .....	7
Essbase for Oracle Cloud Infrastructure .....	7
<b>Oracle Application Development Cloud Services</b>	
Oracle Cloud Infrastructure - Blockchain Platform Cloud Service .....	8
Oracle Visual Builder .....	8
Oracle Digital Assistant Cloud Service .....	8
Oracle Mobile Hub Cloud Service.....	8
Oracle WebLogic for Oracle Cloud Infrastructure .....	8
Oracle Java Cloud Service .....	9
Oracle Tuxedo .....	9
<b>Oracle Big Data Cloud Services</b>	
Oracle Cloud Infrastructure - Anomaly Detection .....	10
Oracle Cloud Infrastructure - Data Labeling .....	10
Oracle Cloud Infrastructure - Document Understanding .....	10
Oracle Cloud Infrastructure - Language .....	11
Oracle Cloud Infrastructure - Speech .....	11
Oracle Cloud Infrastructure - Vision .....	11
Oracle Cloud Infrastructure Generative AI .....	12
Oracle Big Data Service .....	13
<b>Oracle Content Management Cloud Services</b>	
Oracle Media Services .....	14 - 16
WebCenter for Oracle Cloud Infrastructure .....	17
<b>Oracle Data Integration Cloud Services</b>	
Oracle Cloud Infrastructure - Data Integration .....	18
Oracle Data Integrator Cloud Service .....	18
Oracle GoldenGate Cloud Service .....	18
Oracle Stream Analytics for Oracle Cloud Infrastructure .....	18
<b>Oracle Data Management Cloud Services</b>	
Oracle Autonomous Database .....	19 - 25
Oracle Globally Distributed Autonomous Database .....	26
Oracle APEX Application Development .....	26
Oracle Autonomous JSON Database .....	26
Oracle Cloud Infrastructure Database with PostgreSQL .....	26
Oracle Big Data Service .....	26
Oracle Cloud Infrastructure - Database Exadata Infrastructure - X9M and X8M .....	27
Oracle Cloud Infrastructure - Database Exadata Infrastructure - X8 and X7 .....	28
Oracle Compute Cloud@Customer .....	29
Exadata Cloud at Customer - Database ECPUs and OCPUs .....	30 - 32
Oracle Base Database Service .....	33
Oracle Base Database Service on Arm .....	34
Oracle Database Cloud Service .....	35
Oracle Cloud Infrastructure - Database Exadata Racks - X6 .....	36
Oracle MySQL HeatWave: Standard, Bare Metal Standard, Compute, Memory, and Storage .....	37
Oracle MySQL HeatWave - AWS .....	38

## Table of Contents

### Section 1

#### Universal Credits (continued)

##### Oracle Data Management Cloud Services (continued)

Application Performance Monitoring Service .....	39
Oracle Cloud Infrastructure - Data Safe .....	39
Oracle Cloud Infrastructure Database Migration .....	39
Oracle Cloud Infrastructure Search Service with Open Search HA .....	39
Oracle NoSQL .....	40
Oracle Recovery Service .....	41
Oracle Cloud Infrastructure - Cache with Redis .....	41
Oracle Database Backup Service .....	42

##### Oracle Enterprise Integration Cloud Services

Oracle Integration Cloud Service .....	43
Oracle Cloud Infrastructure - Process Automation .....	43
Oracle SOA Suite for Oracle Cloud Infrastructure .....	43

##### Oracle Management Cloud Services

Oracle Cloud Infrastructure Application Performance Monitoring Service .....	44
Oracle Cloud Infrastructure - Database Management .....	44
Oracle Cloud Infrastructure Logging Analytics .....	44
Oracle Cloud Infrastructure Operations Insights .....	45

##### Oracle Security and Identity Cloud Services

Oracle Access Governance .....	46
Oracle Cloud Infrastructure - Identity and Access Management .....	46
Oracle Identity Cloud .....	47
Oracle Cloud Infrastructure - Key Management .....	47
Oracle Threat Intelligence Service .....	47

##### Oracle Compute Cloud Services

Oracle Cloud Infrastructure - Compute - Bare Metal and Virtual Machine .....	48 - 49
Oracle Cloud Infrastructure - Compute - Virtual Machine .....	50
Oracle Cloud Infrastructure - Compute - Bare Metal .....	51
Oracle Cloud Infrastructure - Compute - GPU .....	52
Oracle Cloud Infrastructure - Compute - Microsoft SQL .....	53
Oracle Cloud Infrastructure - Secure Desktop .....	53
Oracle Cloud Infrastructure - Compute - Windows OS .....	53
Oracle Container Engine for Kubernetes .....	53
Oracle Cloud VMware Solution .....	54 - 58
Oracle Cloud Infrastructure - API Gateway .....	59
Oracle Functions .....	59

##### Oracle Network Cloud Services

Oracle Cloud Infrastructure - DNS .....	60
Oracle Cloud Infrastructure - Email Delivery .....	60
Oracle Cloud Infrastructure - FastConnect .....	60
Oracle Cloud Infrastructure - Health Checks .....	60
Oracle Cloud Infrastructure - Load Balancer .....	60
Oracle Cloud Infrastructure - Logging - Storage .....	60
Oracle Cloud Infrastructure - Monitoring .....	61
Oracle Cloud Infrastructure - Network Firewall .....	61
Oracle Cloud Infrastructure - Notifications: HTTPS Delivery, Email Delivery, and SMS Outbound .....	62

## Table of Contents

<b>Section 1</b>	
<b>Universal Credits (continued)</b>	
<b>Oracle Network Cloud Services (continued)</b>	
Oracle Cloud Infrastructure - Outbound Data Transfer .....	63
Oracle Cloud Infrastructure Queue .....	63
Oracle Cloud Infrastructure - Streaming .....	63
Oracle Cloud Infrastructure - Web Application Firewall .....	63
<b>Oracle Storage Cloud Services</b>	
Oracle Cloud Infrastructure - Storage .....	64
<b>Oracle PaaS and IaaS - Other Services</b>	
Oracle Integration Cloud Service for Oracle SaaS .....	65
<b>Section 2</b>	
<b>Analytics Cloud Subscription and Integration Cloud Service for Oracle SaaS</b>	
Oracle Integration Cloud Service for Oracle SaaS .....	67
<b>Section 3</b>	
<b>Cloud at Customer</b>	
Oracle Big Data Cloud@Customer .....	69
Oracle Compute Cloud@Customer .....	70 - 71
Exadata Cloud@Customer - X10M .....	72
Gen 2 Exadata Cloud at Customer Infrastructure - X9M .....	73
Exadata Cloud@Customer - ECPUs and OCPUs .....	74 - 77
Oracle Private Cloud at Customer .....	78
<b>Partner Hardware</b>	
Oracle Cloud@Customer - Partner Hardware .....	79 - 84
<b>Section 4</b>	
<b>Government</b>	
<b>PaaS - Government</b>	
Oracle Security and Identity Cloud Services - Government .....	86

## Table of Contents

### Section 5

#### Pre-Paid Subscription / Metered and Non-metered

##### PaaS - Metered

Oracle Database Cloud Service - Metered .....	88 - 89
Oracle Database Exadata Cloud Service - X6 - Metered .....	90
Oracle Cloud Infrastructure - Database - Dense I/O - Metered .....	91
Oracle Cloud Infrastructure - Database Exadata - X6 - Metered .....	92
Oracle MySQL Cloud Service - Metered .....	93
Oracle GoldenGate Cloud Service - Metered .....	93
Oracle Database Backup Service - Metered .....	94
Oracle Java Cloud Service - Metered .....	95
Oracle Application Container Cloud Service - Metered .....	96
Oracle Data Integrator Cloud Service - Metered .....	96
Oracle Documents Cloud Service and Sites Cloud Service - Metered .....	96
Oracle Integration Platform Cloud Service - Metered .....	97
Oracle Messaging Cloud Service - Metered .....	97
Oracle Mobile Cloud Service - Metered .....	97
Oracle Process Cloud Service - Metered .....	97
Oracle Analytics Cloud - Metered .....	98
Oracle Big Data Cloud Service - Metered .....	98

##### PaaS - Non-metered

Oracle Database Cloud Service - Non-metered .....	99 - 100
Oracle Database Backup Service - Non-metered .....	100
Oracle Java Cloud Service - Non-metered .....	101
Oracle Application Container Cloud Service - Non-metered .....	102
Oracle Integration Cloud Service - Non-metered .....	102

##### IaaS - Metered

Oracle Cloud Infrastructure - Compute - Metered .....	103
Oracle Cloud Infrastructure - Object Storage - Metered .....	103
Oracle Cloud Infrastructure - Network - Metered .....	103
Oracle Cloud Infrastructure - DNS - Metered .....	104
Oracle Cloud Infrastructure - Email Delivery - Metered .....	104
Oracle Cloud Infrastructure - Storage - Metered .....	105
Oracle Cloud Infrastructure Ravello - Metered .....	105
Oracle Cloud Infrastructure - Ravello Service - Metered .....	106
Oracle Cloud Infrastructure - Compute Classic and Block Storage Classic - Metered .....	107
Oracle Cloud Infrastructure - Object Storage Classic and Archive Storage Classic - Metered .....	108

##### IaaS - Non-metered

Oracle Cloud Infrastructure - Compute Classic, Block Storage Classic, DNS, and FastConnect Classic - Metered .....	109
--------------------------------------------------------------------------------------------------------------------	-----

## Table of Contents

### Section 6

#### Advanced Customer Services (ACS) and Consulting

Oracle Consulting Technology Assistance .....	111
Enhanced Customer Audit and Data Center Tour .....	111
Oracle Database Upgrade Package .....	111
Oracle Database Upgrade Service .....	112
Oracle Cloud Priority Support for PaaS and IaaS .....	111
Oracle Advanced Customer Services Supplemental Resource Options for PaaS and IaaS .....	111
Oracle Solution Support Center for PaaS and IaaS .....	111
Data and Device Retention .....	113
Oracle Advanced Customer Services Cloud Support Services .....	114
Oracle Standard Software Installation & Configuration .....	114
Oracle Supportability Planning and Design for Oracle Cloud .....	115
Oracle Advanced Customer Services Supplemental Resources for Oracle Cloud .....	115
Oracle Supplemental Resources for Oracle Cloud Universal Credits .....	115
Oracle Consulting Enterprise Analytics Accelerator .....	116
Oracle National Security Group Cloud Expert Services .....	116
Oracle Consulting Services (Country Zones) .....	117 - 118
Oracle Public Cloud Machine - Disconnected and Semi Connected - Database Exadata Cloud Machine - X6 .....	119
Oracle Public Cloud Machine - X6 - Disconnected and Semi Connected - X6 .....	120
Oracle Public Cloud Machine - Disconnected Mode .....	121

### Section 8

#### Metrics and Metric Definitions

Metrics and Metric Definitions .....	125 - 133
--------------------------------------	-----------

## Section 1 - Universal Credits

Prices in US Dollar

### PaaS - Oracle Analytics Cloud Services: Analytics and Essbase

Standard term lengths: 1-year, 2-year, or 3-year term. For additional information, refer to the Oracle Cloud Approval Matrix document on eSource.  
Note: For details on additional product requirements and prerequisites, see the Oracle PaaS and IaaS - Public Cloud Global Price List Supplement.

	Price	Universal Credits Minimums (per year)	Minimum Universal Credits Details	Notes	Part Number
<b>Oracle PaaS and IaaS Universal Credits</b>					
Oracle PaaS and IaaS Universal Credits	1.00	2,000.00 100,000.00	Minimum Annual Flex Price spend in Universal Credits to be eligible for Universal Credits model Minimum Annual Flex Price spend in Universal Credits to be eligible for discount	1, 9	B88206

Cloud services listed on this page are also available in the Funded Allocation Model targeted at Public Sector customers and subject to authorization by Oracle. For more information refer to the Oracle PaaS and IaaS Universal Credits Service Descriptions document.

	Price	Annual Flex	Metric	Metric Minimum	Additional Information	Notes	Part Number
<b>Oracle Analytics Cloud Services</b>							
<b>Oracle Analytics Cloud</b>							
Oracle Analytics - Professional	16.00	16.00	User Per Month	10		1	B92682
Oracle Analytics - Enterprise	80.00	80.00	User Per Month	10		1	B92683
Oracle Analytics Cloud - Professional	1.0753	1.0753	OCPU Per Hour	-		1, 7	B89630
Oracle Analytics Cloud - Enterprise	2.1506	2.1506	OCPU Per Hour	-		1, 7	B89631
<b>Oracle Analytics for Fusion Applications</b>							
Oracle Analytics for Fusion Applications	0.0000	0.0000	Hosted Named User	10		1	B92686
<b>Oracle Analytics Server for Oracle Cloud Infrastructure</b>							
Oracle Analytics Server for Oracle Cloud Infrastructure*	1.75	1.75	OCPU Per Hour	-		1, 15	B94568
(*Available on the Oracle Cloud Marketplace: See Note 15)							
<b>Essbase for Oracle Cloud Infrastructure</b>							
Essbase for Oracle Cloud Infrastructure*	1.3129	1.3129	OCPU Per Hour	-		1, 15	B92335
(*Available on the Oracle Cloud Marketplace: See Note 15)							

	Price	Annual Flex	Metric	Metric Minimum	Additional Information	Notes	Part Number
<b>Oracle Analytics Cloud Services - Bring Your Own License (BYOL)</b>							
<b>Oracle Analytics Cloud - BYOL</b>							
Oracle Analytics Cloud - Professional - BYOL*	0.3226	0.3226	OCPU Per Hour	-		1, 4, 7, 10	B89636
(*Limited Availability: See Note 10)							
Oracle Analytics Cloud - Enterprise - BYOL*	0.3226	0.3226	OCPU Per Hour	-		1, 4, 7, 10	B89637
(*Limited Availability: See Note 10)							

For Bring Your Own License (BYOL) details and requirements including eligible Oracle on-premise software and conversion ratios (i.e., ratio requirement of software license metric to cloud equivalent metric), click here to get to the Oracle Cloud Services contracts section at Oracle.com (<https://www.oracle.com/contracts/cloud-services>) and search for Oracle PaaS and IaaS Universal Credits Service Descriptions document.

## Section 1 - Universal Credits

Prices in US Dollar

		Price	Universal Credits Minimums (per year)	Minimum Universal Credits Details			Notes	Part Number
<b>Oracle PaaS and IaaS Universal Credits</b>								
Oracle PaaS and IaaS Universal Credits	1.00	2,000.00 100,000.00	Minimum Annual Flex Price spend in Universal Credits to be eligible for Universal Credits model Minimum Annual Flex Price spend in Universal Credits to be eligible for discount				1, 9	B88206

Cloud services listed on this page are also available in the Funded Allocation Model targeted at Public Sector customers and subject to authorization by Oracle. For more information refer to the Oracle PaaS and IaaS Universal Credits Service Descriptions document.

	Price	Annual Flex	Metric	Metric Minimum	Additional Information	Notes	Part Number
<b>Oracle Application Development Cloud Services</b>							
<b>Oracle Cloud Infrastructure - Blockchain Platform Cloud Service</b>							
Oracle Cloud Infrastructure - Blockchain Platform Cloud Service - Standard	0.2150	0.2150	OCPU Per Hour	-		1	B92302
Oracle Cloud Infrastructure - Blockchain Platform Cloud Service - Enterprise	0.4301	0.4301	OCPU Per Hour	-		1	B92303
Oracle Cloud Infrastructure - Blockchain Platform Cloud Service - Storage	70.40	70.40	Terabyte Storage Capacity Per Month			1	B92304
<b>Oracle Visual Builder Cloud Service</b>							
Oracle Visual Builder	1.2365	1.2365	OCPU Per Hour	-		1	B89646
<b>Oracle Visual Builder Studio - Additional Storage</b>							
Oracle Visual Builder Studio - Additional Storage	1.60	1.60	Gigabyte Storage Capacity Per Month	-		1	B90203
<b>Oracle Digital Assistant Cloud Service</b>							
Oracle Digital Assistant Cloud Service	0.0232	0.0232	Request	250	Requires a minimum of 250 Requests per hour.	1	B90260
<b>Oracle Mobile Hub Cloud Service</b>							
Oracle Mobile Hub Cloud Service	0.0028	0.0028	Request	500	Requires a minimum of 500 Requests per hour.	1	B90304
<b>Oracle WebLogic for Oracle Cloud Infrastructure</b>							
Oracle WebLogic Server Enterprise Edition for Oracle Cloud Infrastructure*	0.2581	0.2581	OCPU Per Hour	-		1, 15	B91346
(*Available on the Oracle Cloud Marketplace: See Note 15)							
Oracle WebLogic Suite for Oracle Cloud Infrastructure	0.4646	0.4646	OCPU Per Hour	-		1, 15	B91347
(*Available on the Oracle Cloud Marketplace: See Note 15)							
Oracle WebLogic Server Enterprise Edition for Oracle Cloud Infrastructure Container Engine for Kubernetes*	0.2581	0.2581	OCPU Per Hour	-	All the OCPUs running in the WebLogic node pool must be counted.	1, 15	B92913
(*Available on the Oracle Cloud Marketplace: See Note 15)							
Oracle WebLogic Server Suite for Oracle Cloud Infrastructure Container Engine for Kubernetes*	0.4646	0.4646	OCPU Per Hour	-	All the OCPUs running in the WebLogic node pool must be counted.	1, 15	B92914
(*Available on the Oracle Cloud Marketplace: See Note 15)

#### IaaS Non-metered: Oracle Cloud at Customer - X6

*Note: Standard term length is a 4-year term. For additional information, refer to the Oracle Cloud Approval Matrix document on eSource.*

The following services are not available for purchase using Universal Credits.

	Monthly Subscription Price	Metric	Minimum	Service Includes Per Month	Notes	Part Number
<b>Oracle Cloud at Customer - X6</b>						
Oracle Cloud at Customer X6 Compute - Non-metered	3,000.00		Each	-	40 OCPUs. IaaS service operated by Oracle.	1, 2 B87824
Oracle Cloud at Customer ZS5 Block Storage High I/O - Non-Metered	4,300.00		Each	-	22 terabytes of storage. IaaS service operated by Oracle.	1, 2 B89720
Oracle Cloud at Customer X6 Object Storage - Non-metered	4,200.00		Each	-	128 terabytes of storage. IaaS service operated by Oracle.	1, 2 B87826

### Section 3a - Cloud@Customer - Partner Hardware\*

\*Note: Section 3a represents Cloud at Customer - Partner Hardware only.

Prices in US Dollar

#### PaaS Non-metered: Exadata Cloud@Customer Infrastructure - X10M - Partner Hardware

Note: Standard term length is a 4-year term. For additional information, refer to the Oracle Cloud Approval Matrix document on eSource.

Note: The "Partner Hardware"-specific named SKUs below are only applicable to partners in countries where Oracle has no legal entity and the VAD/VAR takes ownership of the hardware. All other partners outside this VAD/VAR Partner Hardware ownership model should use the same SKUs used by Oracle direct sales.

NOTE: All new sales of *Exadata Cloud@Customer Infrastructure - X10M* requires B91390 - Gen 2 Exadata Cloud at Customer Installation and Activation Service. This service is mandatory and is required for each rack of *Gen 2 Exadata Cloud at Customer Infrastructure - X9M*.

The following services are not available for purchase using Universal Credits.

	Monthly Subscription Price	Metric	Metric Minimum	Additional Information	Notes	Part Number
<b>Exadata Cloud@Customer - X10M</b>						
Exadata Cloud@Customer - Quarter Rack - X10M - Partner Hardware	10,800.00	Hosted Environment Per Month	-	Minimum of 48 months. 1.5 terabyte database server.	1	B96617
Exadata Cloud@Customer - Quarter Rack - X10M - L - Partner Hardware	12,240.00	Hosted Environment Per Month	-	Minimum of 48 months. 2.25 terabyte database server.	1	B98124
Exadata Cloud@Customer - Quarter Rack - X10M - XL - Partner Hardware	15,480.00	Hosted Environment Per Month	-	Minimum of 48 months. 3 terabyte database server.	1	B96618
<b>Exadata Cloud@Customer - X10M - Expansions</b>						
Exadata Cloud@Customer - Database Server - X10M - Partner Hardware	2,160.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months. 1.5 terabyte database server.	1	B96620
Exadata Cloud@Customer - Database Server - X10M - L - Partner Hardware	2,880.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months. 2.25 terabyte database server.	1	B98125
Exadata Cloud@Customer - Database Server - X10M - XL - Partner Hardware	4,500.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months. 3 terabyte database server.	1	B96621
Exadata Cloud@Customer - Base System Storage Server - X10M - Partner Hardware	1,600.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months.	1	B96622
Exadata Cloud@Customer - Storage Server - X10M - Partner Hardware	2,160.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months.	1	B96623
Exadata Cloud@Customer - Expansion Rack - X10M - Partner Hardware	2,160.00 x Rack Term Factor	Hosted Environment Per Month	-	Minimum of 12 months.	1	B96624
<b>Gen 2 Exadata Cloud at Customer Installation and Activation Service</b>						
Gen 2 Exadata Cloud at Customer Installation and Activation Service	30,000.00	Each	-	Installation of hardware, software, and activation of service. This service is mandatory and required for each rack.	1	B91390

Gen 2 Exadata Cloud at Customer Installation and Activation Service	30,000.00	Each	-	Installation of hardware, software, and activation of service. This service is mandatory and required for each rack.	1	B91390

### Section 3a - Cloud@Customer - Partner Hardware\*

\*Note: Section 3a represents Cloud at Customer - Partner Hardware only.

Prices in US Dollar

#### PaaS Non-metered: Gen 2 Exadata Cloud@Customer Infrastructure - X8 - Partner Hardware

**NOTE: Gen 2 Exadata Cloud at Customer Infrastructure - X8 listed below are specifically for resell by Oracle PartnerNetwork (OPN) members only and cannot be sold by Oracle direct sales.**

Note: Standard term length is a 4-year term. For additional information, refer to the Oracle Cloud Approval Matrix document on eSource.

**Note:** The “Partner Hardware”-specific named SKUs below are only applicable to partners in countries where Oracle has no legal entity and the VAD/VAR takes ownership of the hardware. All other partners outside this VAD/VAR Partner Hardware ownership model should use the same SKUs used by Oracle direct sales.

**NOTE:** All new sales of Gen 2 Exadata Cloud at Customer Infrastructure - X8 requires B91390 - Gen 2 Exadata Cloud at Customer Installation and Activation Service. This service is mandatory and is required for each rack of Gen 2 Exadata Cloud at Customer Infrastructure - X8.

The following services are not available for purchase using Universal Credits.

	Monthly Subscription Price	Metric	Minimum	Service Includes Per Month	Notes	Part Number
<b>Gen 2 Exadata Cloud at Customer Infrastructure - X8 - Partner Hardware</b>						
Gen 2 Exadata Cloud@Customer - Database Server - X8 - Partner Hardware - Non-Metered	2,700.00	Hosted Environment Per Month	-	Minimum of 48 hours.	1	B91043
Gen 2 Exadata Cloud at Customer Storage Server X8 - Partner Hardware - Non-metered	2,700.00	Hosted Environment Per Month	-		1	B91041
Gen 2 Exadata Cloud@Customer Base System - Database Server Infrastructure IB - Partner Hardware - Non-Metered	2,000.00	Hosted Environment Per Month	-	Minimum of 48 hours.	1	B91044
Gen 2 Exadata Cloud at Customer Base System Storage Server - X-IB - Partner Hardware - Non-metered	2,000.00	Hosted Environment Per Month	-		1	B91042
<b>Gen 2 Exadata Cloud at Customer Installation and Activation Service</b>						
Gen 2 Exadata Cloud at Customer Installation and Activation Service	30,000.00		Each	- Installation of hardware, software, and activation of service. This service is mandatory and required for each rack.	1	B91390

OCPUs for Gen 2 Exadata Cloud at Customer Infrastructure - X8 are available for purchase through the Universal Credits model. For reference, repeated below from the Universal Credits section of this price list (from Section I) are the available OCPU services (i.e., Oracle Cloud Infrastructure - Exadata Cloud at Customer - Database OCPU) that enable OCPUs to be added to Gen 2 Exadata Cloud at Customer Infrastructure - X8.

**NOTE:** Universal Credits cannot be used to purchase Gen 2 Exadata Cloud at Customer Infrastructure - X8 (listed directly above).

## Section 5 - Pre-Paid Subscription / Metered

Prices in US Dollar

### PaaS Metered: Oracle Cloud Infrastructure - Database Exadata Racks - X6

Note: Standard term length is a 1-year term. For additional information, refer to the Oracle Cloud Approval Matrix document on eSource.

	Price	Minimum	Includes	Notes	Part Number
<b>Oracle Database Public Cloud Services</b>					
Oracle Database Public Cloud Services	1.00	-	Increases Cloud balance by 1 (one) currency unit, for use to purchase Oracle Database Public Cloud Services.	1	B77326

The following services are eligible for purchase both with Oracle Database Public Cloud Services "Pre-Paid Subscription" and "Price."

Note: "Price," which also includes "bursting," is always at the current hourly list price ("Per Hour" metrics), is non-discountable, will be billed monthly in arrears and cannot be paid with "Pre-Paid Subscription."

	Price	Metric	Minimum	Service Includes Per Month	Notes	Part Number
<b>Oracle Cloud Infrastructure - Database Exadata Racks - X6 - Metered</b>						
Oracle Cloud Infrastructure - Database Exadata Quarter Rack - X6 - Metered	110,000.00	Hosted Environment Per Month	-	22 enabled OCPUs. Up to 62 additional OCPU's (purchased separately). 2 DB nodes with 720 GB RAM per node. 288 TB raw storage or 84 TB of usable storage. Unlimited I/Os.	1	B87866
Oracle Cloud Infrastructure - Database Exadata Half Rack - X6 - Metered	220,000.00	Hosted Environment Per Month	-	44 enabled OCPUs. Up to 124 additional OCPU's (purchased separately). 4 DB nodes with 720 GB RAM per node. 576 TB raw storage or 168 TB of usable storage. Unlimited I/Os.	1	B87867
Oracle Cloud Infrastructure - Database Exadata Full Rack - X6 - Metered	440,000.00	Hosted Environment Per Month	-	88 enabled OCPUs. Up to 248 additional OCPU's (purchased separately). 8 DB nodes with 720 GB RAM per node. 1,152 TB raw storage or 336 TB of usable storage. Unlimited I/Os.	1	B87868
Oracle Cloud Infrastructure - Database Exadata Additional OCPU's - X6 - Metered	5,000.00	OCPU Per Month	See Supplement for Minimum details.	Additional enabled OCPUs.	1	B87869
Oracle Cloud Infrastructure - Database Exadata Additional OCPU's - X6 - Metered	8.401	OCPU Per Hour	See Supplement for Minimum details.	Additional enabled OCPUs.	1	B87870

## **Prices in US Dollar**

Oracle Consulting Services

**The following services are not available for purchase using "Universal Credits," "Pre-Paid Subscription," or "Price."**

Pricing for different countries for the professional services offerings listed below are represented in six different Country Zones (Country Zones AA through E). Each Country Zone includes a list of countries and represents the pricing for each country (based on each country's currency). All Country Zone pricing is based on a percentage of the price point listed in the "Base Price (in U.S. dollars)" column, which is then translated into that country's currency (based on Oracle's Local Pricing Exchange Rates). The "Base Price (in U.S. dollars)" is not the price for any of the professional services offerings, but is the price that is used to calculate the Country Zone prices.

		Base Price (in U.S. dollars)	Country Zone AA	Country Zone A	Country Zone B	Country Zone C	Country Zone D	Country Zone E	Part Number
			Price (one-time fee)

Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for X6 Compute	525.00		Each	-		1, 2 B88036
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for ZS5 Block Storage	492.00		Each	-		1, 2 B88037
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for X6 Object Storage	375.00		Each	-		1, 2 B88038

### Oracle Public Cloud Machine - X6 - Semi-Connected Mode

The following services are not available for purchase using "Universal Credits," "Pre-Paid Subscription," or "Price."

	Monthly Subscription Price	Metric	Minimum	Service Includes Per Month	Notes	Part Number
<b>Oracle Public Cloud Machine - X6 - Semi-Connected Mode - High Cost Region</b>						
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Compute	1,992.00		Each	-		1, 2 B88135
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for ZS5 Block Storage	1,806.00		Each	-		1, 2 B88136
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Object Storage	978.00		Each	-		1, 2 B88137
<b>Oracle Public Cloud Machine - X6 - Semi-Connected Mode - Medium Cost Region</b>						
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Compute	763.60		Each	-		1, 2 B88135
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for ZS5 Block Storage	692.30		Each	-		1, 2 B88136
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Object Storage	374.90		Each	-		1, 2 B88137
<b>Oracle Public Cloud Machine - X6 - Semi-Connected Mode - Low Cost Region</b>						
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Compute	332.00		Each	-		1, 2 B88135
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for ZS5 Block Storage	301.00		Each	-		1, 2 B88136
Oracle Public Cloud Machine - Semi-Connected Mode - Add-On Fee for X6 Object Storage	163.00		Each	-		1, 2 B88137

**Section 6 - Advanced Customer Services and Consulting**

Prices in US Dollar

The following services are not available for purchase using "Universal Credits," "Pre-Paid Subscription," or "Price."

**Oracle Public Cloud Machine - Disconnected Mode**

	Monthly Subscription Price	Metric	Minimum	Service Includes Per Month	Notes	Part Number
<b>Oracle Public Cloud Machine - Disconnected Mode - High Cost Region</b>						
Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee	83,335.00		Each	-	-	1, 6 B87635
Oracle Public Cloud Machine - Disconnected Mode 8x5 - Base Fee	28,200.00		Each	-	-	1, 2, 6 B88034
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Eighth or Quarter Rack	11,760.00		Each	-	-	1 B87636
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Half Rack	30,090.00		Each	-	-	1 B87637
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Full Rack	57,150.00		Each	-	-	1 B87638
<b>Oracle Public Cloud Machine - Disconnected Mode - Medium Cost Region</b>						
Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee	50,001.00		Each	-	-	1, 6 B87635
Oracle Public Cloud Machine - Disconnected Mode 8x5 - Base Fee	16,800.00		Each	-	-	1, 2, 6 B88034
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Eighth or Quarter Rack	6,300.00		Each	-	-	1 B87636
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Half Rack	12,685.00		Each	-	-	1 B87637
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Full Rack	27,900.00		Each	-	-	1 B87638
<b>Oracle Public Cloud Machine - Disconnected Mode - Low Cost Region</b>						
Oracle Public Cloud Machine - Disconnected Mode 24x7 - Base Fee	16,667.00		Each	-	-	1, 6 B87635
Oracle Public Cloud Machine - Disconnected Mode 8x5 - Base Fee	6,000.00		Each	-	-	1, 2, 6 B88034
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Eighth or Quarter Rack	1,050.00		Each	-	-	1 B87636
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Half Rack	2,950.00		Each	-	-	1 B87637
Oracle Public Cloud Machine - Disconnected Mode - Add-On Fee for Full Rack	9,000.00		Each	-	-	1 B87638

## Section 7 - Notes

1. See the **Oracle PaaS and IaaS Public Cloud Global Price List Supplement** for details on additional requirements and prerequisites. This price list supplement is available on eSource at <http://esource.oracle.com> > Home (tab) > Price Lists & Supplements > Oracle Platform as a Service and Infrastructure as a Service - Public Cloud > Oracle Platform as a Service and Infrastructure as a Service Public Cloud Global Price List Supplement OR click here:

[https://esource.oraclecorp.com/sites/eSource/ContentAsset\\_1530207473236](https://esource.oraclecorp.com/sites/eSource/ContentAsset_1530207473236)

If you are an Oracle PartnerNetwork (OPN) member, please refer to the "Oracle Cloud Services Pricing & Licensing" section on OPN (Sign In required):

<https://www.oracle.com/opn/secure/gtm/transacting-tools/cloud-price-lists/index.html>

### Additional Resources

**Oracle PaaS and IaaS Universal Credits Service Descriptions**, **Oracle Cloud Hosting and Delivery Policies**, and **Oracle PaaS and IaaS Public Cloud Services Pillar Document** are available at the Oracle Cloud Services Contracts section here at Oracle.com: <https://www.oracle.com/contracts/cloud-services/>

**Program Documentation:**

<https://docs.oracle.com/en/>

**Oracle Contracts:**

<https://www.oracle.com/contracts/cloud-services/>

**Subscribe to Policy Update Alerts:**

**Oracle Universal Credits Pricing (OCI Price List):**

<https://www.oracle.com/cloud/price-list.html>

**Oracle Cost Estimator:**

<https://cloud.oracle.com/cost-estimator>

**pricing:**

<https://www.oracle.com/cloud/bring-your-own-license/faq/universal-credit-pricing.html>

**Oracle Universal Credits Billing Models:**

<https://docs.oracle.com/en/cloud/get-started/subscriptions-cloud/ocpib/billing-models-offered.html>

2. This offering is on Engineered Qualification (EQ) and requires approval. For the Engineered Qualification approval process, please use the Deal Approval System (DAS).

If you are an Oracle PartnerNetwork (OPN) member, please contact your Oracle representative for additional information.

3. This product is **Priced in Advance of Availability** and is not yet available, but it is listed on the price list as Priced in Advance of Availability. Priced in Advance of Availability status provides the price in order to discuss pricing with customers, but a product that is Priced in Advance of Availability cannot be included in a customer quote or contract.

4. For Bring Your Own License (BYOL) details and requirements including eligible Oracle on-premise software and conversion ratios (i.e., ratio requirement of software license metric to cloud equivalent metric), see the Oracle PaaS and IaaS Universal Credits Service Descriptions document at the Oracle Cloud Services contracts section here at Oracle.com:

<https://www.oracle.com/contracts/cloud-services/>

For Bring Your Own License (BYOL) requirements for Cloud@Customer including eligible Oracle on-premise software licenses and conversion ratios (i.e., ratio requirement of software license metric to cloud equivalent metric), see the Oracle Platform as a Service and Infrastructure as a Service - Public Cloud Service Descriptions - Metered & Non-Metered document at Oracle.com:

<https://www.oracle.com/contracts/cloud-services/>

For Bring Your Own License (BYOL) requirements for Government including eligible Oracle on-premise software licenses and conversion ratios (i.e., ratio requirement of software license metric to cloud equivalent metric), see the Oracle Government Tech Cloud Service Descriptions document at Oracle.com:

<https://www.oracle.com/contracts/cloud-services/>

For Frequently Asked Questions: Oracle BYOL to PaaS:

<https://www.oracle.com/cloud/bring-your-own-license/faq/>

6. This cloud service is not discount eligible. Discounting greater than 0% for this service requires approval from HQAPP. Please refer to the Oracle Cloud Approval Matrix document for additional information.

If you are an Oracle PartnerNetwork (OPN) member, please contact your Oracle representative for additional information.

7. Prior to June 1, 2018, this service was also eligible for purchase with B88643 - Oracle Analytics Universal Credits [for North America] and as of June 1, 2018, only existing customers can use B88643 - Oracle Analytics Universal Credits [for North America] for expansions and renewals only. All new customers should use the following Universal Credits part number: **B88206 - Oracle PaaS and IaaS Universal Credits**.

8. Service includes third-party functionality, but has no royalty discount restriction. For third-party and royalty information and any related restrictions, see the Royalty Reporting and Contract Compliance page at my.oracle.com:

<https://mysites.oracle.com/prc-global/royalty-reporting---compliance/general-information.html>

If you are an Oracle PartnerNetwork (OPN) member, please contact your Oracle representative for additional information.

## Section 7 - Notes (continued)

9. As of June 1, 2018, new customers should use only the following Universal Credits part number: **B88206 - Oracle PaaS and IaaS Universal Credits** for purchasing Universal Credits for PaaS and/or IaaS services and the following Universal Credits part numbers are only available for existing customers (prior to June 1, 2018) for expansions and renewals: B88640 - Oracle PaaS and IaaS Universal Credits [for North America]; and B88643 - Oracle Analytics Universal Credits [for North America]. (Note 7 highlights the services that were also eligible for purchase with B88643 - Oracle Analytics Universal Credits [for North America] and this part number (i.e., B88643) is now only available for existing customers for expansions and renewals).

10. **Limited Availability:** This Cloud Service may not be available in all data center regions. Data center availability for all Oracle Cloud Infrastructure (OCI) services can be found at OCI Data Regions section here at Oracle.com: <https://www.oracle.com/cloud/public-cloud-regions/data-regions/>

11. **Limited Availability:** This Cloud Service may not be available in all data center regions, and may be provided on a limited basis for any new orders; the successor to this Cloud Service is detailed in the **Oracle PaaS and IaaS Universal Credits Service Descriptions** document in **Appendix A** at Oracle.com: <https://www.oracle.com/contracts/cloud-services/>  
Data center availability for all Oracle Cloud Infrastructure (OCI) services can be found at OCI Data Regions section here at Oracle.com: <https://www.oracle.com/cloud/public-cloud-regions/data-regions/>

12. For Block Volume Performance options, see **Oracle PaaS and IaaS Universal Credits Service Descriptions** document at Oracle.com: <https://www.oracle.com/contracts/cloud-services/>  
For additional detail, see doc.cloud.oracle.com: [https://docs.oracle.com/en-us/iaas/Content/Block/Concepts/blockvolumeperformance.htm#Block\\_Volume\\_Performance](https://docs.oracle.com/en-us/iaas/Content/Block/Concepts/blockvolumeperformance.htm#Block_Volume_Performance)

13. Oracle may make this service available as an "**Always Free Cloud Services**" to certain customers at no charge subject to specific terms. Always Free Cloud Services may be designated as free in two ways: (1) via a specific cloud service that is designated as "Free" in the name; or (2) via a specified cloud service tier of usage that is designated as zero dollar (\$0) in the Rate Card and provided it is noted in the **Oracle PaaS and IaaS Universal Credits Service Descriptions** document as having a free tier (a "Free Tier").

For more information, please refer to the "Always Free Cloud Services" section in the Oracle PaaS and IaaS Universal Credits Service Descriptions document at: <https://www.oracle.com/contracts/cloud-services/>

In addition, see Always Free and Free Tiers at docs.cloud.oracle.com: <https://docs.cloud.oracle.com/en-us/iaas/Content/FreeTier/freetier.htm>

Also see the Frequently Asked Questions section also at Oracle.com: <https://www.oracle.com/cloud/free/faq.html>

14. When activating this cloud service, a minimum of 48 hours will be charged for this service for the first month whether or not the service is being actively used or not during this period. For additional detail, see the "Minimum Service Period" section in the **Oracle PaaS and IaaS Universal Credits Service Descriptions** document at Oracle.com: <https://www.oracle.com/contracts/cloud-services/>

15. This cloud service is available on the Oracle Cloud Marketplace. For additional detail, see the "Cloud Marketplace" section in the **Oracle PaaS and IaaS Universal Credits Service Descriptions** document at Oracle.com: <https://www.oracle.com/contracts/cloud-services/>

Introduction to the Oracle Cloud Marketplace: <https://docs.oracle.com/en/cloud/marketplace/marketplace-cloud/index.html>

Oracle Cloud Marketplace can be accessed here: [https://cloudmarketplace.oracle.com/marketplace/en\\_US/homePage.jspx](https://cloudmarketplace.oracle.com/marketplace/en_US/homePage.jspx)

18. The following services: Oracle Cloud Infrastructure - Database Exadata Infrastructure - Database Server -X8M; and Oracle Cloud Infrastructure - Database Exadata Infrastructure - Storage Server -X8M, can be purchased at the time of the purchase of the associated Oracle Cloud Infrastructure - Database Exadata Infrastructure - Quarter Rack - X8M or after, but the two services must co-terminate with the associated Oracle Cloud Infrastructure - Database Exadata Infrastructure - Quarter Rack - X8M; Exadata Cloud Infrastructure - Database Server -X9M; and Exadata Cloud Infrastructure - Storage Server -X9M, can be purchased at the time of the purchase of the associated Exadata Cloud Infrastructure - Quarter Rack – X9M or after, but the two services must co-terminate with the associated Exadata Cloud Infrastructure - Quarter Rack – X9M.

## Section 8 - Metrics and Metric Definitions

**API Call:** is defined as any API call or notification consumed by any application built on the service.

**API Calls:** is defined as the number of calls incoming from a client to the Oracle Cloud Infrastructure Threat Intelligence Service endpoint. A call may include GET or LIST commands to retrieve certain threat intelligence indicator data from the Oracle Cloud Infrastructure Threat Intelligence Service endpoint. Calls are metered on a per tenancy basis. Each search in the console or call to the API is considered an API call for the purposes of metering.

**Active User Per Hour:** Is defined as a unique active user that interacts with the Oracle Cloud Service through a specific channel (website, mobile app, API, SMS) during a 1-hour period. Active users are tracked through the use of audit logs, cookies, user ids, tokens, device ids, IP's or session id's. Access across multiple channels will be counted as multiple active users on an hourly basis. An active user is tracked for each instance of the Oracle Cloud Service.

For the purposes of the Oracle Identity Cloud Service, the interaction with the Service consists of, but is not limited to, specific actions or events performed within the Service (authentication, Single Sign On, user provisioning, step-up authentication, password management, etc.).

For the purposes of the Oracle Content and Experience Cloud Service and Oracle Content and Experience Cloud Service - Classic, the Service tracks either named users or visitors based upon the role that a user is given in the Service; users with anonymous access to the Service will be tracked as visitors. Visitor access – whether for anonymous or registered visitors - across multiple channels during the same hour counts as multiple active visitor users. In addition, during the same hourly period, the Service also tracks:

- The number of API calls made to the Service by third party applications. If the number of API calls exceeds the number of API calls that are entitled per active user, a new active user will be added.
- The number of published assets. A published asset is either a file-based asset (e.g., a document, an image, or a video) or a content item (a block of information created using a content type) either of which has been published during the hourly period. If the number of published assets exceeds the number of published assets that are entitled per active user, a new active user will be added.
- Outbound data transfer per active user per hour. Outbound data transfer is defined as the quantity during an hour of the Oracle Cloud Service of both the data You download from the Oracle Cloud Service plus any transfer of data from the Oracle Cloud Service over the internet, including responses to Your client requests.

**Annotated Data Records:** is defined as the number of data records that were assigned one or more labels. An annotated data record involves (a) creating one or more bounding boxes to an image, (b) classifying an entire image, document or text, or (c) highlighting part of text, video or speech with labels.

**Cluster Per Hour:** is defined as the number of Cluster hours used as part of the Oracle Container Engine for Kubernetes (OKE) service. It is billed per second and measured as the number of OKE Enhanced clusters for a duration measured in seconds – rounded up to the nearest whole number with minimum of 1-minute. A cluster is an instance of the Container Engine for Kubernetes service that includes the control plane that implements core Kubernetes functionality and the cluster data plane comprised of worker nodes that runs the applications that you deploy in a cluster.

**CPU Core Per Hour:** is defined as the total number of CPU cores of processor hours enabled for monitoring as part of the Oracle Cloud Infrastructure Database Management service. The number of CPU cores shall be determined based upon the total number of CPU cores of the processor on the host, VM or Container on which the target is being monitored, and equals the current number of CPU cores on the system that includes sub-cores of multi-core CPUs, as well as single-core CPUs. The number of sockets multiplied by the number of CPU cores per socket will give the total count of CPU cores. Programs licensed on a CPU core basis may be accessed by your internal users (including agents and contractors) and by your third party users. Each partial CPU core per hour consumed will be billed as a full hour.

Notes:

1. Oracle Database Enterprise or Standard Edition processor count definition, policy and limits do not apply.
2. Multiple targets running on the same hosts, VMs, or Containers will be counted only once for licensing purposes.
3. CPU cores of each instance of Oracle Real Application Clusters must be counted.
4. If You are using a standby database and Data Guard is monitored and managed by the Oracle Cloud Infrastructure Database Management Service, then CPU cores of these instances must also be counted for licensing purposes.
5. On Exadata systems, CPU cores on all the database instance hosts must be counted for licensing purposes, however CPU cores of Exadata Storage Server need not be counted for licensing purposes.

**Device:** is defined as a unique device that transmits data to or receives data from Oracle applications or Oracle Cloud Services. Devices include, but are not limited to, sensors, meters, RFID readers, and barcode scanners. A Device that is connected directly to Oracle applications or Cloud Services, or connected indirectly such as through a gateway device or a third-party communications service, is uniquely identified as being the endpoint of communication of data to or from the Oracle application or Oracle Cloud Service. A Device may also be registered with the Oracle application or Cloud Service, uniquely identifying it as the endpoint of communication.

**ECPU Per Hour:** is (a) for the purposes of Oracle Autonomous Database, based on the number of cores per hour elastically allocated from a pool of compute and storage servers and (b) for the purposes of MySQL Database and MySQL HeatWave, a platform-independent measure of the work done per hour by the MySQL Database and MySQL HeatWave.

**Endpoints Per Month:** for the purposes of Oracle Cloud Infrastructure - Health Checks - Premium; and Oracle Cloud Infrastructure - Health Checks - Basic, Endpoints Per Month is defined as the number of endpoints (IP addresses or HTTP targets) monitored from up to 10 locations for each protocol (HTTP, HTTPS, TCP, ICMP, etc.) at either a high or low frequency rate of measurement (e.g., every 10 seconds versus every 30 seconds), during a given calendar month of the Service.

For the purposes of Oracle Cloud Infrastructure - Web Application Firewall - Non-OCI Endpoint Endpoints Per Month is defined as the number of Origin Server configured on the Web Application Firewall

**Execution Hour:** is defined as the number of execution hours used by Pipeline Operators as part of Oracle Cloud Infrastructure Data Integration. A scheduled run of a single task counts as a pipeline with a single Pipeline Operator execution. Each partial Execution Hour consumed is billed as a partial hour with a one-minute minimum. The first 30 hours of Execution Hour per tenant per month is free.

**Execution Pack Per Month:** is defined as up to 10,000 execution activities during each month of the Services Period, with one execution pack equaling up to 10,000 activities. An activity is any available element in the palette such as notifications, human tasks, service calls, start/end events, and gateways. An executed activity is defined as an activity that is executed at runtime when a transaction or payload is processed.

**Exadata TB (Terabyte) Storage Capacity Per Month:** is defined as the number of terabytes of Exadata storage reserved for Oracle Autonomous Data Warehouse or Oracle Autonomous Transaction Processing or reserved for cross-region Autonomous Data Guard staging, if applicable, during each month of the Services Period of the applicable Oracle Cloud Service.

**Gateway Per Hour:** is defined as single state representation of one or many instances (called gateway nodes) of the gateway application component installation. A gateway is represented as a "Gateway" in the management service gateway table in the database and is shown as such in the user interface. A gateway is counted by counting the number of gateways in the "Gateways" tab in the management service user interface during a single hour. When a gateway node is registered to the management service, You have the option to register it to an existing gateway or to create a new gateway. When the last node is de-registered, You will have the option to delete the gateway and reduce the count of gateways.

**Gibibyte Memory (GiB) Per Hour:** is defined as 1 gibibyte of memory capacity in the server as a part of the Oracle Cloud Service.

**Gigabyte Data Capacity:** is defined as the volume of data generated, ingested, managed and analyzed from the Monitored Accounts and Monitored Apps. Capacity may include but is not limited to development, test, QA, training, pre-production, production, HA, DR or any other environments that You deem necessary to be monitored by the Company's service offering.

**Gigabyte (GB) Data Capacity Per Hour:** for the purposes of Oracle CASB for IaaS and Oracle CASB for Custom Apps is defined as the volume of data generated, ingested, managed and analyzed from the Monitored Accounts and Monitored Apps per hour. Capacity may include but is not limited to development, test, quality assurance (QA), training, pre-production, production, high availability (HA), disaster recovery (DR) or any other environments that You deem necessary to be monitored by Oracle's Cloud Service offering.

For the purposes of Oracle CASB for Data Protection, Data Loss Prevention Retroactive Scan, Gigabyte (GB) of Data Capacity Per Hour is defined as the volume of data scanned per hour.

**Gigabyte Log Storage Per Month:** is defined as the number of GB of logs stored inside the Oracle Cloud Infrastructure Logging Cloud Service during a month of the Oracle Cloud Service. The minimum amount that will be billed is 1 MB.

## Section 8 - Metrics and Metric Definitions (continued)

**Gigabyte Memory Per Hour:** is defined as the number of gigabyte memory hours allocated as part of Oracle Application Container Cloud Service instance.

**Gigabyte Memory Per Month:** is defined as the number of gigabyte memory hours allocated as part of Oracle Application Container Cloud Service instance in a calendar month.

**Gigabyte (GB) of Data Processed:** is defined as the quantity of any transfer of data to or from the Load Balancer over the internet including responses to Your client requests during a calendar month.

For the purposes of Oracle Cloud Infrastructure Network Firewall, Gigabyte (GB) of Data Processed is defined as every GB of data processed by the network firewall instance in a month.

**Gigabyte (GB) of Data Processed Per Hour:** is defined as the quantity of gigabytes of data processed from/to the Oracle Data Integration Platform Cloud Service (host or remote agents), which may include counting any combination of data throughput for data replication, batch data movement, data streaming or data cleansing operations. For the purposes of Oracle Cloud Infrastructure Data Integration, Gigabyte of Data Processed Per Hour is defined as the quantity of gigabyte of data input into Oracle Cloud Infrastructure Data Integration during a one hour period.

**Gigabyte of Good Traffic Per Month:** is defined as the data of the HTTP response egress traffic passed through the Web Application Firewall as a reverse proxy from the origin server.

**Gigabyte (GB) of Packaged Video Content:** is defined as the number of gigabytes requested by a video player or content delivery network (CDN) service and packaged to Oracle Cloud Infrastructure Media Streams during a month.

**Gigabyte (GB) Outbound Data Transfer Per Month:** is defined as the quantity during a calendar month of the Oracle Cloud Service of both the data You download directly from the Oracle Cloud Service plus the quantity of Outbound Data Transfer from the Oracle Cloud Service over the internet, including responses to Your client requests and the data You transfer between Oracle Cloud Infrastructure regions.

**Gigabyte (GB) Performance Units Per Month:** is defined as per gigabyte storage performance characteristics for the Oracle Cloud Infrastructure block volume during a month of the Service. This metric must be purchased and is metered in increments of 10. You may adjust performance characteristics such as IOPS/GB, throughput/GB, and maximum IOPS for the Oracle Cloud Infrastructure block volume.

**Gigabyte Per Hour:** is defined as 1 GB of memory capacity in the server as a part of the Oracle Cloud Service.

**Gigabyte Per Month:** is defined as the total amount of data size in gigabytes extracted from source Oracle Enterprise Manager or Oracle Automatic Workload Repository data from Oracle Database every month. The data size measured is uncompressed data.

**Gigabyte Storage Capacity Per Hour:** is defined as all VM disk space calculated per hour. Volume storage is billed at 2.1 times the amount of application storage. This is done to account for snapshots, blueprints and other advanced functionality. Library storage accounts for all library VMs, blueprints and stopped VMs.

**Gigabyte Storage Capacity Per Month:** is defined as a gigabyte (1,073,741,824 bytes) of computer storage space used by a storage filer of the Oracle Cloud Service during a month of the service.

**Gigabyte (GB) Storage Retrieved Per Month:** is defined as a gigabyte (1073741824 bytes) of computer storage retrieved during a month of the Oracle Cloud Service.

**HeatWave Capacity Per Hour:** is defined as a unit of 16 Gigabyte memory hours allocated in MySQL HeatWave.

**Host CPU Core Per Hour:** is defined as the total number of cores of the processors used per hour underlying the physical host, VM, or container on which the target database or host is being monitored externally. All host CPU cores are counted, including cores underlying both primary and standby databases, and cores running each instance of RAC. If multiple Oracle database targets are running on the same processors of the physical hosts, VMs or containers, then the host CPU core will only be counted once. Each partial Host CPU Core hour consumed will be billed as a full hour.

**Hosted Connection:** is defined as a unique connection used to build integrations between applications using the Oracle Integration Cloud Service or Oracle Integration Cloud Service for CX. A Connection is counted per unique application, data source, third party software, Oracle software, Web Service or REST end point to which the Oracle Integration Cloud Service is connected. Web Services that use the same WSDL url and credential are counted as one Connection.

**Hosted Environment:** is the combination of systems and supporting resources to which Oracle grants you access as part of the Oracle Cloud Services ordered by you, that is (i) configured for the Oracle Programs operating on it and for specific uses as part of the Oracle Public Cloud Services, and (ii) used by Oracle to perform the Oracle Cloud Services. The Hosted Environment consists of the Production Environment, and any non-Production Environment(s), as referenced in the applicable Ordering Document and services policies.

**Hosted Environment Per Hour:** is defined as the combination of systems and supporting resources provided as part of the Oracle Data Management Cloud Services (the Hosted Environment), the use of which is measured on a per hour basis. Each partial Hosted Environment hour consumed will be billed as a partial hour. The included amount of the following items vary per service and selected shape, and are as specified in the Service Descriptions for the applicable Cloud Service: minimum Services Period, base number (zero or more) of OCPU enabled, optional maximum OCPU capacity and local storage capacity.

Please note that:

For High IO & Dense IO capacity: Each Hosted Environment has 2 OCPUs enabled. You may scale up to 36 OCPUs in increments of 2.

For 2-node RAC: Each Hosted Environment has 4 OCPUs enabled. You may scale up to 72 OCPUs in increments of 4.

**Hosted Environment Per Month:** is the combination of systems and supporting resources to which Oracle grants You access as part of the Oracle Cloud Services ordered by You, that is (i) configured for the Oracle Programs operating on it and for specific uses as part of the Oracle Public Cloud Services, and (ii) used by Oracle to perform the Oracle Cloud Services. The hosted environment consists of the production environment, and any non-production environment(s), as referenced in the applicable ordering document.

For the purposes of Oracle NoSQL Database Cloud Service

- o You are provided a minimum of 420,000 read units per month
- o You are provided a minimum of 280,000 write units per month
- o You are provided a minimum of 17,500 GB storage per month

**Hosted Named Agent:** is defined as the data collectors on the target Java Virtual Machine ("JVM") and there is one Hosted Named Agent deployed per JVM. Hosted Named Agents collect JVM monitoring data related to JVM threads, stacks, requests, methods, heap and CPU usage.

**Hosted Named User:** is defined as an individual authorized by you to access the hosted service, regardless of whether the individual is actively accessing the hosted service at any given time.

**Hosted Named User Per Hour:** is defined as an individual authorized by You to access the hosted Cloud Service in an hour, regardless of whether the individual is actively accessing the hosted Cloud Service at any given time.

**Hosted Named User Per Month:** is defined as an individual authorized by you to access the hosted service in a calendar month, regardless of whether the individual is actively accessing the hosted service at any given time.

**Hosted Node:** is defined as a high-performance, Infiniband-enabled server for extending Hadoop clusters on the Oracle Big Data Cloud Service.

**Inferencing Unit Hour:** is an hour an inferencing unit is dedicated for running a custom model. Any partial inferencing unit hours will be charged as a full hour. Inference units provide a throughput equivalent to 500 characters per second.

## Section 8 - Metrics and Metric Definitions (continued)

**Instance Per Hour:** For the purposes of Web Application Firewall ("WAF"), an instance is defined as an active WAF policy attached to a web-application or a load balancer instance. Every hour the policy and the attachment are in active status is counted as an instance per hour.

For the purposes of Oracle Cloud Infrastructure Network Firewall, every hour the network firewall instance is in active status is counted as an instance per hour.

**Instance Per Month:** is defined as a single deployment of an Oracle Cloud Service provisioned by You.

**Interactions Per Month:** is defined as a request initiated from client browser delivering up to 100,000 of data in a calendar month. If a request exceeds 100,000 it will account for multiple interactions.

**Key Version Per Month:** is defined as one key version in a single-tenant accessible encryption key storage vault used on an Oracle Cloud Infrastructure Cloud Service where that Service is measured and billed on a monthly basis.

**Load Balancer Hour:** is the number of hours from when a given Load Balancer is launched until it is terminated. Each partial server-hour consumed will be billed as a full hour.

**Logging Analytics Storage Unit:** is defined as a gigabyte (1,073,741,824 bytes) of logs stored inside Oracle Cloud Infrastructure Logging Analytics during a month of the Oracle Cloud Service. One Logging Analytics Storage Unit equates to 300 gigabytes of Log Storage per month. The minimum billing threshold is 1 Logging Analytics Storage Unit.

**Logging Analytics Storage Unit Per Hour:** is defined as 300 GB of logs stored during an hour of the service. The units of storage are evaluated hourly.

**Logging Analytics Storage Unit Per Month:** is defined as 300 gigabytes of logs stored during a month of the Oracle Cloud Service. The minimum amount that will be billed is 1 Logging Analytics Storage Unit.

**Mbps Per Hour:** is the bandwidth of the load balancer represented in Mbps per hour. This metric is only applicable to the 10 Mbps Load Balancer paid version and has to be configured at 10 Mbps per hour.

**Migration Hour:** is defined as the amount of time that a migration is running, where 'running' is defined as a migration job being in a state of "in progress" or in a state of "waiting". Partial Migration Hours consumed are billed as partial hours with a one-minute minimum.

**Million Datapoints:** is defined as a count in the millions of the Oracle Cloud Infrastructure Monitoring Datapoints either ingested or retrieved for a Monitoring Metric.

**Million Delivery Operations:** is defined as the number of delivery operations in the millions performed by the Oracle Cloud Infrastructure Notifications Service, including retries to deliver messages to HTTPS endpoints. Each 8KB portion of delivered data is billed as 1 operation.

**Minute of Output Media Content:** is defined as the length of output media content that is processed by Oracle Cloud Infrastructure Media Flow Cloud Service during a one-minute period. Each minute will be billed in 6 second increments.

**Monitored Account:** is the account that You established with Your IaaS or PaaS provider, that includes (1) the Your email address and password, (2) the control of resources available or created within the account, and (3) payment for the IaaS or PaaS activity related to those resources. You may monitor the Monitored Account by use of this Oracle CASB Cloud Service. The IaaS or PaaS account has permission to do anything and everything with all the account resources.

**Monitored Account Per Hour:** is defined as the account that You established with Your IaaS or PaaS provider that includes (1) the Your email address and password, (2) the control of resources available or created within the account, and (3) payment for the IaaS or PaaS activity related to those resources. Each Active IaaS/PaaS Monitored Account by use of the applicable Oracle Cloud Service. Active means account is configured and activated in Oracle CASB Cloud Service.

**Monitored App:** is defined as any custom or tailor-made application or workload that is specifically developed and deployed by You on a Cloud-based or IaaS infrastructure, either for internal or external use, that You monitor with this Oracle CASB Cloud Service. A Monitored App may include but is not limited to development, test, quality assurance (QA), training, pre-production, high availability (HA), disaster recovery (DR) or any other environments that You deem necessary to be monitored by this Oracle Cloud Service.

**Monitored App Per Hour:** is defined as any custom or tailor-made application or workload that is specifically developed and deployed by You on a PaaS or IaaS based infrastructure, either for internal or external use, that is configured and activated and that You monitor each hour with the applicable Oracle Cloud Service. A Monitored App may include but is not limited to development, test, quality assurance (QA), training, pre-production, high availability (HA), disaster recovery (DR) or other environments that You monitor with this Oracle CASB Cloud Service

**Monitored Service User:** is defined as an individual user of Your Cloud/SaaS applications, who You are authorized to monitor with this Oracle CASB Cloud Service. Users may include but are not limited to the employees, customers, partners, consultants, contractors and agents of You, Your customers and Your customers' affiliates.

**Monitored Service User Per Hour:** is defined as a user in Your SaaS applications, who You are authorized to monitor each hour for each service with the Oracle CASB Service. User accounts may include individual user accounts as well as accounts shared by multiple users of the monitored SaaS application and are not limited to the employees, customers, partners, consultants, contractors and agents of You, and Your customers

**Node Per Hour:** is defined as the number of node hours used as part of the Oracle Cloud Service. A node is a predefined combination of OCPUs's (or vCPUs) and memory based on the shape. Each partial node hour consumed is billed as a partial hour, with a one-minute minimum.

For the purposes of Oracle Cloud Infrastructure Search Service with OpenSearch – Node – Metered, a node is defined as the number of data node instances that can be part of a cluster system in one hour.

For the purposes of Oracle Cloud Infrastructure Search Service with OpenSearch, a data node instance is defined as the number of Compute instances with an instance type of data node that can be part of a clustered system in one hour. A customer can have two data nodes within its cluster without any hourly metering. Only any additional data nodes after the second data node will be charged the Oracle Cloud Infrastructure Search Service with OpenSearch HA rate. For example, a two-data node cluster will not be metered. If a third data node is added, there would be a single data node per hour charge metered for the third data node. If a fourth data node is added, then two data node per hour charges will be incurred.

**NVMe Terabyte (TB) Per Hour:** is defined as 1 TB of NVMe storage capacity in the server as a part of the Oracle Cloud Service, where a TB is defined as 1000 gigabytes.

## **Section 8 - Metrics and Metric Definitions (continued)**

**OCPU Per Hour:** is defined as the number of Oracle Compute Unit (OCPU) hours used as part of the Oracle Cloud Service. An OCPU provides CPU capacity equivalent of one physical core of a processor with hyper-threading enabled. Each OCPU corresponds to two hardware execution threads, known as vCPUs. Each OCPU has a pre-defined amount of memory. Each partial OCPU Hour consumed will be billed as a full hour subject to the following exceptions.

## Section 8 - Metrics and Metric Definitions (continued)

**OCPU Per Month:** is defined as one Oracle Compute Unit (OCPU) used in a calendar month. An OCPU provides CPU capacity equivalent of one physical core of an Intel Xeon processor with hyper threading enabled. Each OCPU corresponds to two hardware execution threads, known as vCPUs. An OCPU Per Month is counted as a full month of service as soon as the service is activated regardless of how often or how long the service is used within the month. For the purpose of Oracle GoldenGate Cloud Service, only (a) the OCPU running the Oracle cloud database from which you capture data and/or (b) the OCPU running the Oracle cloud database where you will apply the data must be counted.

**One Million IO Requests Per Month:** is defined as the maximum of one million IO requests during a calendar month of the Oracle Cloud Service of the type of Block Storage IO Requests You use in the Oracle Cloud Service.

**Partition Hour:** is defined as the number of Partition hours used as part of the Oracle Cloud Service. A Partition provides the capacity equivalent of 1 MB/s of data ingress, 2 MB/s of data egress and 1000 PUT operations per second.

**Performance Units Per Gigabyte Per Month:** is defined as per gigabyte storage performance characteristics for the Oracle Cloud Infrastructure block volume during a month of the Service. This metric must be purchased and is metered in increments of 10. You may adjust performance characteristics such as IOPS/GB, throughput/GB, and maximum IOPS for the Oracle Cloud Infrastructure block volume.

**Port Hour:** is defined as the number of port-hours consumed for each port configured.

**Processor:** is defined in the Definitions and License Metrics section of the Oracle License Definitions and Rules which can be found on oracle.com/contracts.

**Ravello Compute Hour:** is defined as the number of compute hours used as part of the Oracle Ravello Cloud Service. Ravello Compute Hour price is based on the size of the service (i.e., whether R1 or R2), the minimum application price (the "M"), the networking tier (whether *Advanced* or *Enterprise*), and the deployment mode (whether *Cost Optimization* or *Performance Optimization*).

R1: means those Oracle Ravello Cloud Services - which provide CPU and memory capacity equivalent to 2 vCPUs and 4 GB RAM.

R2: means those Oracle Ravello Cloud Services - which provide CPU and memory capacity equivalent to 2 vCPUs and 8 GB RAM.

M: means the minimum fees applicable to the Oracle Ravello Cloud Services - per application Ravello Compute Hour of usage. The minimum fee applies if the fees for the number of R1/R2 compute hours used as part of the Oracle Ravello Cloud Service - in an hour would otherwise fall below this minimum.

**Recipe Jobs Per Hour:** is defined as the total number of recipe jobs launched within an hour window for all users within an Oracle Self Service Integration Cloud Service instance. A recipe job for an active recipe is launched to process its associated data when the recipe's trigger event and condition are met.

**Read Unit Per Month:** is defined as the throughput of up to one kilobyte (KB) of data per second for an eventually consistent read operation (i.e., where the data returned may not be the most recently written data to the database; if no new updates are made to the data, eventually all accesses to that data will return the latest updated value) over a one-month period, or approximately two million six hundred thousand (2.6 million) reads. (Each month is deemed to have seven hundred forty-four (744) hours or approximately two million six hundred thousand (2.6 million) seconds. So over a one-month period, one (1) read unit will provide You with approximately 2.6 million reads.) To achieve the throughput of up to one kilobyte (KB) of data per second for an absolute consistent read operation (i.e., where the data returned is expected to be the most recently written data to the database), the equivalent of two Read Units Per Month need to be provisioned.

**Redis Memory Gigabyte Per Hour:** is a management fee charged for offering the managed service that is tied to the amount of memory deployed per node. Memory is defined as the number of gigabytes of memory capacity utilized per hour per node in the Oracle Cloud Infrastructure Caching with Redis Cloud Service. As a note, this management fee also accounts for all underlying infrastructure deployed.

**Request:** is defined as the number of requests made to the Oracle Cloud Service. A request is defined as an API call from a mobile app or one round trip interaction (request to a bot and a response from that bot) or a push initiated from the Oracle Cloud Service. For the purposes of the Oracle Digital Assistant Cloud Service, a request is counted as follows: (a) any round-trip conversation with the chatbot skill; (b) authentication and authorization (login); (c) invocation of an instant app or WebView component; (d) use of the tester in the Bots admin tool; (e) push notifications from the skill ; (f) drill down from the Bot Insights home page to Insight Details; and (g) calling the embedded custom component code.

**Request Per Hour:** is defined as the number of requests made to the Oracle Cloud Service in an hour. A request is defined as an API call from a mobile app or one round trip interaction (request to a bot and a response from that bot) or a push initiated from the Oracle Cloud Service.

**Static IP Per Hour:** is defined as the number of Static IP hours used as part of the Oracle Compute Cloud Service. These hours could include additional static IPs associated with a running instance or static IPs that are not associated with any running instance.

**Storage Pack:** is defined as one hundred (100) gigabytes of file storage across all users per tenant.

**Target Database Per Month:** is defined as a unique database target (either on-premises or running in a virtual machine on infrastructure as a service) registered to be managed by the Oracle Cloud service during a month.

**TB of Storage Capacity:** is defined as a terabyte of computer storage space used by a storage filer equal to one trillion bytes through the Cloud Service.

**Terabyte Storage Capacity Per Month:** is defined as a terabyte (1,024 gigabytes) of computer storage space used by a storage filer of the Oracle Cloud Service during a month of the Service.

**Training Hour:** is defined as the number of hours spent training a custom model. Any partial training hour will be charged as a full hour.

For the purposes of Oracle Cloud Infrastructure – Vision, users have the option to either define a set number of hours (i.e., 3) or choose a “recommended” training duration, which can be up to 24 hours.

For the purposes of Oracle Cloud Infrastructure – Language – Custom Training, a training hour is the equivalent of training on an 8 core CPU machine.

**Transcription Hour:** is defined as the cost of transcribing one hour of audio into text.

**Token:** is defined as a JSON Web Token (JWT) that is issued by the Cloud Service and used to securely transmit information between parties during a one hour period.

**User Per Month:** is defined as an individual configured to access the hosted service during the billing period, regardless of whether the individual is actively accessing the hosted service at any given time. You will be billed at the maximum configured user count during each billing period, even if users are removed from the hosted service during this period.

For purposes of the Oracle Container Pipelines Cloud Service, users are represented in container pipelines as members of an organization. For each billed entity there must be one parent organization under which all of its users and sub-organizations are managed.

For the purpose of Oracle Analytics Cloud User-per-Month, users you will be charged immediately on creation of the instance for all users that are configured. The minimum number of users charged for is 10.

## Section 8 - Metrics and Metric Definitions (continued)

**vCPU Per Hour:** is defined as the number of compute hours used as part of the Cloud Service. It provides CPU capacity equivalent of one hardware execution threads, known as vCPUs. The vCPU Per Hour price is based on the deployment model.

For Cloud Services on Oracle Cloud Infrastructure (whether standard, enterprise or metal).

Standard means those Cloud Services which provide CPU capacity equivalent to 100% vCPUs overcommit.

Enterprise means those Cloud Services which provide CPU capacity with no vCPUs overcommit.

Metal means those Cloud Services which provide dedicated, for your application, bare metal servers allocated in 36 vCPU units with no vCPUs overcommit.

For non-elastic IP addresses, fees are based on the time period the virtual machines are actually running. For elastic IP addresses, fees are based on the entire time period that the IP is allocated for Your use.

**Video Pack (500 Videos - 500 Gigabytes (GB)) Per Month:** is defined as up to 500 videos consuming up to 500 GB of storage per month.

**Virtualized-Gigabyte Per Month:** is defined as the sum of the storage space used from the following: equivalent to weekly full backups, daily incremental backups, and archived redo log backups of the Oracle Database instances during a calendar month.

**Virtual Machine IP Per Hour:** is defined as the number of Virtual Machine IP hours allocated or used as part of the Oracle Ravello Cloud Service. These hours could include elastic and non-elastic IP addresses. For non-elastic IP addresses, fees are based on the time period the VMs are actually running. For elastic IP addresses, fees are based on the entire time period that the IP is allocated for Your use.

**Virtual Private Vault Per Hour:** is defined as 1 single-tenant accessible encryption key storage vault used on Oracle Cloud Infrastructure (OCI) that is measured on an hourly basis and billed on a monthly basis.

**Workforce User Per Month:** is defined as an identity that is configured to access the hosted service through user interface or programmatically during the billing period, regardless of whether the identity is actively accessing the hosted service at any given time.

- For the purposes of Oracle Access Governance (AG), identities who could access the service through the service user interface or through external user interfaces to manage their own access or accesses of other identities should be marked as Workforce Users.
- Identities that include, but are not limited to, employees, temporary workers, outsourcers, and contractors whose birth right and regular accesses are managed through access controls of AG should be marked as Workforce users.
- Workforce users marked as Active in Access Governance will be billed. You will be billed on a monthly basis for the configured Workforce User count metered every hour.

**Workspace Usage Per Hour:** Is defined as the workspace instance provided as part of Oracle Cloud Infrastructure Data Integration, the use of which is measured on a per hour basis.

**Write Unit Per Month:** is defined as the throughput of up to one kilobyte (KB) of data per second for a write operation over a one month period, or approximately two million six hundred thousand (2.6 million) writes. (Each month is deemed to have seven hundred forty-four (744) hours or approximately two million six hundred thousand (2.6 million) seconds. So over a one-month period, one (1) write unit will provide You with approximately 2.6 million writes.)

## Section 8 - Metrics and Metric Definitions (continued)

**1 SMS Message Sent:** is defined as each Short Message Service (SMS) message (counted on a per recipient basis) that is accepted by the Oracle Cloud Infrastructure Notifications Service to deliver during the applicable billing period. A single Oracle Cloud Infrastructure Notifications Service topic with 10 different recipients would therefore be counted as 10 SMS messages (e.g., 140,000 SMS Messages accepted, each with 2 different recipients would be charged as 280,000 SMS messages). The cost of each SMS message depends on the destination country zone of the recipient (e.g., a message sent to a recipient in the United States would be charged at the per SMS message rate of country zone 1 while a message sent to a recipient in Canada would be charged at the per SMS message rate of country zone 2). The list of countries within a specific country zone may change periodically and the latest list may always be found on the Oracle Cloud Infrastructure Notifications Service pricing page.

**10 Concurrent Connections:** is defined as a maximum of 10 Concurrent Messaging Connections, of which You can send and receive up to a total of five million (5,000,000) messages per month. Each Concurrent Messaging Connection can send and receive up to a total of five million (5,000,000) messages per month. Each Message Push Listener may each use exclusively one Messaging Connection. The number of Message Push Listeners within a Service instance may not exceed the number of Concurrent Messaging Connections within that instance.

**10 Monitored Resources Per Hour:** is defined as 10 monitored resources per hour, where a monitored resource is part of the technology stack, such as an application (e.g., Oracle E-Business Suite (EBS) and EBS components such as Concurrent Processing), a database (e.g., Oracle database), or an application server (e.g., Oracle WebLogic Server).

For the purposes of billing, each instance of a monitored resource type is counted as one resource. For clustered resources, the cluster - including all individual members - is collectively counted as one resource (i.e., individual members of the cluster are not counted). For example, an Oracle WebLogic Cluster containing 2 Oracle WebLogic Servers would be counted as one monitored resource. Monitored resources will be charged in blocks of 10 Monitored Resources Per Hour; each partial 10 Monitored Resources Per Hour will be charged as a full 10 Monitored Resources Per Hour.

**10 Monitor Runs Per Hour:** is defined as 10 monitor runs where a monitor run is an execution of one monitor (scripted monitor, page load monitor, REST API monitor) from one Advantage point location. Usage of an external Vantage Point location to execute a monitor; each execution is counted as 3 monitor runs.

**100 Entities Per Hour:** is defined as 100 entities where each Entity refers to a technical asset being managed or monitored, such as a server, database, application that resides either in the cloud and/or on-premise during a one hour period. Examples of entities include, but are not limited to: Host, Docker Container, SQL Server instance, MySQL instance, Oracle Database instance, WebLogic Server, Tomcat, Oracle Traffic Director Instance, custom created entity, etc.

You have the ability to extend existing pre-defined Entities and create Your own entirely custom Entities. In extending pre-defined Entities, a maximum of five (5) additional numeric time series is allowed. For custom Entities, a total of 40 numeric time series are allowed (a numeric time series is a measurement of time associated with an Entity, such as response time, transaction per second, CPU %, etc.).

For the purposes of counting certain entity types, a conversion factor will be applied:

- One database Oracle Compute Unit (OCPU) will count as 1 Entities.
- One database processor will count as 2 Entities.
- One Application Performance Monitoring Agent (an "APM Agent") will count as 15 Entities.

An APM Agent is defined as the data collector on a target application server being monitored, whether in the cloud or on-premise. Examples of target application servers include but are not limited to a single JVM, a single .NET Application Domain, or a single host running Node.JS.

**100 Monitored Objects:** is defined as 100 Monitored Objects where each object refers to a technical asset being monitored, such as a server, database, application that resides either in the cloud and/or on-premise. Examples of monitored objects include, but are not limited to: Host, Docker Container, SQL Server instance, MySQL instance, Oracle Database instance, WebLogic Server, Tomcat, Oracle Traffic Director instance, etc.

For the purposes of Oracle Infrastructure Monitoring Cloud Service, customers have the ability to extend existing pre-defined monitored objects and create their own entirely custom monitored objects. In extending pre-defined monitored objects, a maximum of five (5) additional numeric time series is allowed and for custom monitored objects, a total of 40 numeric time series is allowed (a numeric time series is a measurement of time associated with a monitored object, such as response time, transaction per second, CPU %, etc.).

**250 Video Assets Per Month:** is defined as 250 video assets per month, where one (1) video asset is one (1) advanced video (published or not published) stored in an Oracle Content Management asset repository, or 20 files of any type stored in the Oracle Content Management advanced video project workspace. An advanced video project workspace is used for storing user-contributed draft files.

If the total number of video assets utilized during a month exceeds the number of video assets that are entitled per 250 Video Assets per Month, an additional 250 Video Assets per Month will be charged. Only the current top level revision of any given video asset is counted toward the total number of video assets.

If an Oracle Content Management instance has been provisioned and designated as a non-primary instance, only a single quantity of 250 Video Assets Per Month will be charged regardless of the total number of video assets being replicated. A non-primary instance can be used for disaster recovery, development, staging or quality assurance activities.

**300 Gigabytes Per Hour:** is defined as 300 gigabytes of total indexed size of stored log data.

**1,000 Daily Visitor Sessions:** is defined as 1000 Daily Visitor Sessions where a Daily Visitor Session is defined as a unique individual who accesses the service during a 24 hour period using a specific channel (e.g. web site, mobile app) and is identified through the use of cookie, device id, IP or session id. Access across multiple channels counts for multiple visitor sessions.

**1,000 Emails Sent:** is defined as 1,000 emails that are accepted by the Email Delivery Cloud Service to receive and parse or to deliver to the end recipient in the billing period, where an email is defined as an electronic mail message, counted on a per recipient basis. A single email with 10 different recipients would be counted as 10 emails (e.g., 140,000 emails accepted, each with 2 different recipients would be charged  $280 \times \$0.085 = \$23.80$ ). For the purposes of Oracle Cloud Infrastructure - Notifications - Email Delivery Cloud Service, each 64KB portion of delivered data is billed as 1 email. For the purposes of Oracle Cloud Infrastructure – Notifications - Email Delivery Cloud Service, each 2MB portion of delivered data is billed as 1 email. The maximum message size of 10MB will be billed as 5 emails (e.g., 140,000 emails accepted at 10MB size, each with 2 different recipients would be charged  $280 \times \$0.085 \times 5 = \$119.00$ ).

**1,000 Events Per Hour:** is defined as 1,000 events where an event is one distributed tracing span. A distributed tracing span describes the time it takes to complete an individual unit of work in the distributed system. Each distributed tracing span encapsulates an operation name, context information, a start and finish timestamp, a set of key value tags that can be used for annotation and key value logs that can be used to capture messages and debug information related to the span.

**1,000 Messages:** is defined as 1,000 Messages per Month, where one Message is a packet of data sent between (to or from) a Device and Oracle Internet of Things Cloud Service during a calendar month.

**1,000 Requests Per Month:** is defined as maximum of 1,000 Requests per Month, of the type of REST API Requests You use in the Oracle Cloud Service, including PUT, HEAD, POST, COPY, LIST, DELETE and GET.

**1,000 Transactions:** is defined for the purposes of Oracle Cloud Infrastructure - AI Services – Language as the number of 1,000-characters within a document that is provided as an input to the service (API call). For example, if a customer called this Cloud Service with a single tweet (up to 280 characters long), that would be counted as a single Transaction. If a customer called this Cloud Service with a document that is 3 pages long and totaling 5,000 characters, that would be counted as 5 Transactions. If the document totaled 5,001 characters, it would be counted as 6 Transactions.

## Section 8 - Metrics and Metric Definitions (continued)

**5,000 Assets Per Month:** is defined as 5,000 Assets Per Month, where one (1) asset is one (1) item of any type (published or not published) stored in the Oracle Content and Experience Cloud Service asset repository. An asset stored in the asset repository can be either a file based asset (e.g., a document, an image, a video) or a content item and a content item is a block of information created using a content type. Every twenty (20) files of any type stored in the Oracle Content and Experience documents file repository counts as one (1) asset.

If the number total number of assets utilized during a month exceeds the number of assets that are entitled per 5,000 Assets Per Month an additional 5,000 Assets Per Month will be charged.

Only the current top level revision of any given file or asset is counted toward the assets counts.

If an Oracle Content Management instance has been provisioned and designated as a non-primary instance, only a single quantity of 5,000 Assets Per Month will be charged regardless of the total number of assets being replicated. A non-primary instance can be used for development, staging, QA or disaster recovery.

Each provisioned Oracle Content Management instance is charged a minimum of 5,000 Assets Per Month (i.e., the minimum charge is one 5,000 Assets pack per instance). You will be charged for the total count of 5,000 Assets packs per month used across all provisioned Oracle Content Management instances (primary and non-primary) within Your Cloud Services Account.

**5,000 Messages Per Hour:** is defined as the number of 5,000 message quantities used as part of the Oracle Cloud Service. A message is defined as up to 50 kilobytes (KB) of in-and-out transmission from/to the Oracle Cloud Service. Any message over 50KB in size must be counted as multiple messages, with each 50KB or portion thereof counting as equivalent to one message (e.g., 210KB would be counted as 5 messages).

For the purposes of the Oracle Integration Cloud Service (all editions), a message is calculated following these rules:

- Integrations:
- o Trigger: Each trigger activity counts as at least one message, depending on the message size. If the inbound message payload exceeds 50KB, 1 additional message is counted for each additional 50KB (e.g., 210 KB would be counted as 5 messages).
  - o Invoke: Invoke requests do not count as messages, but invoke responses that are greater than or equal to 50KB count as messages. If an invoke response message payload exceeds 50KB, 1 additional message is counted for each additional 50KB (e.g., 210 KB would be counted as 5 messages). If the invoke response message payload is less than 50KB, then the invoke response is not counted as a message.
  - o File: For file-based scheduled flows where there are incoming files into integrations, each file is converted into a billed message (in multiples of 50KB) only when the file size is greater than or equal to 50KB.

Process Automation:

- o One concurrent user for the process automation feature is equal to 400 messages.

Integration Insight:

- o Each business transaction in Insight counts as one message.

Visual Builder

- o One concurrent user for the Visual Apps feature is equal to 100 messages.

Internal: Internal calls within the same Oracle Integration Cloud Service instance are not counted as messages. For example, the following are not counted:

- o Process to Integration
- o Visual Builder to Integration
- o Integration to Integration

Calling another Oracle Integration Cloud Service instance does incur messages in the target Oracle Integration Cloud Service instance, and, depending on the response size, may also incur messages in the Oracle Integration Cloud Service instance from which the call originates.

**10,000 API Calls per Month:** is defined as 10,000 of any API call or notification consumed by any application built on the Oracle Mobile Cloud Service during a month of the service.

**10,000 Audit Records Per Target Per Month:** is defined as 10,000 database audit records collected from a specific database target by the Oracle Cloud Service during a month.

**10,000 Gigabyte Memory-Seconds:** is defined as 10,000 gigabyte memory-seconds, where a gigabyte memory-second is defined as the amount of RAM (GB) allocated to a function during its execution (S). Oracle will charge You for the number of 10,000 GB-S quantities used by all functions in a month. Billing for partial 10,000 GB-S quantities will be prorated.

**10,000 Requests Per Month:** is defined as maximum of 10,000 Requests per Month, of the type of REST API Requests You use in the Oracle Cloud Service, including PUT, HEAD, POST, COPY, LIST, DELETE and GET.

## Section 8 - Metrics and Metric Definitions (continued)

**20,000 Messages Per Hour:** is defined as the number of 20,000 message quantities used as part of the Oracle Cloud Service. A message is defined as up to 50 kilobytes (KB) of in-and-out transmission from/to the Oracle Cloud Service. Any message over 50KB in size must be counted as multiple messages, with each 50KB or portion thereof counting as equivalent to one message (e.g., 210KB would be counted as 5 messages). For the purposes of the Oracle Integration Cloud Service – BYOL (all editions), a message is calculated following these rules:

- Integrations:
- o Trigger: Each trigger activity counts as at least one message, depending on the message size. If the inbound message payload exceeds 50KB, 1 additional message is counted for each additional 50KB (e.g., 210 KB would be counted as 5 messages).
  - o Invoke: Invoke requests do not count as messages, but invoke responses that are greater than or equal to 50KB count as messages. If an invoke response message payload exceeds 50KB, 1 additional message is counted for each additional 50KB (e.g., 210 KB would be counted as 5 messages). If the invoke response message payload is less than 50KB, then the invoke response is not counted as a message.
  - o File: For file-based scheduled flows where there are incoming files into integrations, each file is converted into a billed message (in multiples of 50KB) only when the file size is greater than or equal to 50KB.

Process Automation:

- o One concurrent user for the process automation feature is equal to 400 messages.

Integration Insight:

- o Each business transaction in Insight counts as one message.

Visual Builder

- o One concurrent user for the Visual Apps feature is equal to 100 messages.

Internal: Internal calls within the same Oracle Integration Cloud Service instance are not counted as messages. For example, the following are not counted:

- o Process to Integration
- o Visual Builder to Integration
- o Integration to Integration

Calling another Oracle Integration Cloud Service instance does incur messages in the target Oracle Integration Cloud Service instance, and, depending on the response size, may also incur messages in the Oracle Integration Cloud Service instance from which the call originates.

Any combination of message input, message output, concurrent users, or message sizes may be utilized concurrently, but must not exceed the maximum quantity of 20,000 Messages Per Hour that You set when You create an instance for the Oracle Cloud Service.

**100,000 Events Per Hour:** is defined as 100,000 events where an event is one distributed tracing span. A distributed tracing span describes the time it takes to complete an individual unit of work in the distributed system. Each distributed tracing span encapsulates an operation name, context information, a start and finish timestamp, a set of key value tags that can be used for annotation and key value logs that can be used to capture messages and debug information related to the span.

**1,000,000 API Calls:** is defined as 1,000,000 API calls or notifications (or combination thereof) incoming from a client to the Oracle Cloud Infrastructure API Gateway Service. Billing for partial 1,000,000 API calls will be prorated.

**Million Datapoints:** is defined as a count in the millions of the Oracle Cloud Infrastructure Monitoring Datapoints either ingested or retrieved for a Monitoring Metric.

**Million Delivery Operations:** is defined as the number of delivery operations in the millions performed by the Oracle Cloud Infrastructure Notifications Service, including retries to deliver messages to HTTPS endpoints. Each 8KB portion of delivered data is billed as 1 operation.

**1,000,000 DNS Traffic Management Queries:** is defined as 1,000,000 DNS Traffic Management queries received by the OCI authoritative DNS nameserver infrastructure during the monthly billing period. Oracle will charge You for the number of DNS Traffic Management queries received by the Public DNS Authoritative Service at a prorated cost of \$4.00 per 1 Million Traffic Management queries during the billing period (e.g., 100 Million Traffic Management queries received will be charged  $100 \times \$4.00 = \$400$ ).

**1,000,000 Function Invocations:** is defined as 1,000,000 function invocations, where a function invocation is defined as a request received from a client to execute a single function. Oracle will charge You for the number of 1,000,000 invocation quantities used in a month. Billing for partial 1,000,000 invocation quantities will be prorated.

**1,000,000 Incoming Requests Per Month:** is defined as a collection of 1,000,000 page hits over HTTP/S incoming from a client on the internet or CDN to the Web Application Firewall.

**One Million IO Requests Per Month:** is defined as the maximum of one million requests during a calendar month of the Oracle Cloud Service of the type of Block Storage IO Requests You use in the Oracle Cloud Service.

**1 Million Messages Per Month:** is defined as the number of 1,000,000 message quantities per month used as part of the Oracle Cloud Service. A message is defined as up to 50Kb of in-and-out transmission from/to the Oracle Cloud Service. Any messages over 50Kb in size must be counted as multiple messages, with each 50Kb or portion thereof counting as equivalent to one message (e.g., 210Kb would be counted as 5 messages). One concurrent user for the process automation feature is equal to 400 messages. One concurrent user for the Visual Apps feature is equal to 100 messages.

**1,000,000 Queries:** is defined as the number of DNS queries received by the public authoritative DNS server at a prorated cost of \$1.00 per 1 million queries during the monthly billing period (e.g., 500 million queries received would be invoiced at  $500 \times \$1.00 = \$500$ ).
